### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1, 4, 5, 8, 9, 13-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Kim et al (US 6,766,528).

The applied reference has a common Assignee with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

#### Claim 1:

Kim discloses:

"displaying an audio video (AV) broadcast signal and a first data broadcast signal based on a first broadcasting standard", see Fig. 2 items 106, 107, col. 1 lines 7-9, col. 2 lines 51-53;

Art Unit: 2622

"tuning to a second data broadcast signal based on a second broadcasting standard different than the first broadcasting standard in response to a request for a modification of the data broadcast signal being displayed", see Fig. 2 items 204, 201, col. 6 lines 13-16, col. 3 line 67 to col. 4 line 5;

"and displaying the tuned second data broadcast signal based on the second broadcasting standard", see col. 6 lines 26-28, col. 4 lines 4-5;

"wherein when the A/V broadcast signal is a first A/V broadcast signal including the first data broadcast signal, the first A/V broadcast signal is received and tuned through a first tuner", see Fig. 2 items 103, 104;

"wherein when the A/V broadcast signal is a second A/V broadcast signal including the second data broadcast signal, the second A/V broadcast signal is received and tuned through a second tuner", see Fig. 2 item 204, col. 6 lines 13-22;

"wherein when the first A/V broadcast signal is received and tuned through the first tuner, a first transport packet processor (see Fig. 2 items 105, 202, 201) connected to an output of the first tuner extracts the first data broadcast signal from the first A/V broadcast signal, and when the second A/V broadcast signal is received and tuned through the second tuner, a second transport packet processor (see Fig. 2 items 203 202, 201) connected to an output of the second tuner extracts the second data broadcast signal from the second A/V broadcast signal";

"and wherein a data processor connected to the first and second transport packet processors processes the corresponding first and second data broadcast signals, and an A/V processor connected to the first and second transport packet processors

Art Unit: 2622

processes the corresponding first and second A/V broadcast signals such that any one of the first and second data broadcast signals can be displayed together with any one of the first and second A/V broadcast signals", see col. 5 lines 15-56, col. 6 lines 23-55.

Claim 4 is also disclosed, Kim teaches simultaneously displayed as claimed, see Kim at col. 4 lines 4-5, col. 6 lines 26-28.

Claim 5 is rejected for the same reasons as claim 1.

Claim 8 is rejected for the same reasons as claim 4.

Claim 9 is rejected for the same reasons as claim 1.

Claim 13 is disclosed, see col. 3 line 67 to col. 4 line 5, col. 5 line 57 to col. 6 line 28.

Claim 14 is rejected for the same reasons as claim 4.

Claim 15 is rejected for the same reasons as claim 1.

## Response to Arguments

3. Applicant's arguments have been fully considered but they are moot in view of further interpretation of the reference to Kim necessitated by the amendment, and all the claimed limitations have been considered in the rejection.

### Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2622

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean W. Désir whose telephone number is (571) 272 7344. The examiner can normally be reached on 5/4/9 - First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David L. Ometz can be reached on (571) 272 7593. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

6. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
